

# PRE-PAID TANKER FILLING SYSTEM

- Efficient accounting and recovery of water charges.
- Automated system operation reduces the human error & water loss.
- Reduces documentation.
- Tank drivers will get water by using Pre-Paid Card (Pre-Loaded) of equivalent practical quantity / amount loaded by him.
- User friendly pre-paid card system can be operated easily.
- If organisation is giving water to tankers free of cost, this system can be used for report generation & monitoring of water dispensed through tankers filling station.
